Find opportunities for savings with free tool loans

JOIN US FOR A FREE IN-PERSON TRAINING EVENT

DECEMBER 11, 2026 at 3pm AT THE SMART BUILDINGS CENTER

1200 12th Ave. S. Suite 110, Seattle WA 98144

In this training session, we'll demonstrate how various data loggers available to borrow for free from the Tool Library can help operations professionals save time and money in their buildings by assisting with finding opportunities for operational improvement. We'll get hands-on with loggers capable of monitoring:

- Motor run-time
- Temperature
- Humidity
- Light levels
- Occupancy
- Energy use
- CO2 levels

USE CASES INCLUDE

- Verifying HVAC, lighting, and process equipment schedules
- Reviewing optimal stop/start capabilities
- Reviewing HVAC set points and reset schedules
- Identifying unintended or inappropriate instances of simultaneous heating and cooling
- Identifying zones that are dominating multi-zone system operations
- Verifying lighting sensors are working and located appropriately
- Identifying energy waste due to lighting levels that exceed needs
- Assessing ventilation system effectiveness

We'll also learn best practices for setting up effective logging sessions with ease.
