Fall 2017 Lighting Fundamentals Course

Newer lighting practitioners, building owners, facility managers, electrical contractors, engineers, utility managers, architects, product reps, and design students are encouraged to enroll.

Morning Class

10:00 a.m. - Noon

Light Sources and Luminaires - 103

This class will review existing legacy, as well as modern LED light sources and luminaires. You will learn the major characteristics of modern LED light sources and luminaires, and how to effectively select and specify them for projects.

Afternoon Class

12:30 p.m. - 2:30 p.m.

The Lighting Design Process - 105

We will explore light quantity and light quality, the layering of light, and the hierarchy of needs when it comes to lighting choices. You will learn how to approach any lighting situation and come away with an understanding of how to maximize performance in existing buildings and new construction.

Class Locations and Dates

Lynnwood	Wednesday, October 4
Tacoma	Friday, October 6
Seattle	Friday, October 13

Cost

\$30 per class (full-day \$60) Lunch Included
