

## Seattle Clean Buildings Accelerator: No-Cost Technical Support to Meet WA Clean Buildings

With a priority on buildings that serve or are in frontline and BIPOC communities\*, the Seattle Clean Buildings Accelerator is a no-cost technical support and training program for owners and managers of Seattle buildings 50,000 sq. ft. and larger. It will help participants meet the Washington State Clean Buildings law and reduce climate-polluting emissions that harm people's health and the environment.

The City of Seattle Office of Sustainability and Environment (OSE) is working with Stillwater Energy to provide no-cost support to help building owners and managers meet the State law, which requires building owners to develop and submit energy management documentation, determine and comply with energy use intensity targets (a building's annual energy use per square foot), and report those targets via ENERGY STAR Portfolio Manager.

### Self-Led and Tailored Support

The Seattle Clean Buildings Accelerator lets you choose your level of engagement by offering a suite of support and educational materials, including:

	SUPPORT OFFERING	
Objectives	Self-led Education	Tailored Support
<b>Understand the law and code</b>	<ul style="list-style-type: none"><li>• Pre-recorded webinars</li></ul>	<ul style="list-style-type: none"><li>• Live virtual workshops</li></ul>
<b>Identify energy- and emissions-reducing opportunities</b>	<ul style="list-style-type: none"><li>• Common energy- and emissions-reducing opportunities</li></ul>	<ul style="list-style-type: none"><li>• Site-specific virtual energy walkthrough</li><li>• List of specific projects</li></ul>
<b>Develop documentation</b>	<ul style="list-style-type: none"><li>• Checklists</li><li>• Templates and examples</li></ul>	<ul style="list-style-type: none"><li>• Expert review of documentation</li></ul>
<b>Meet performance targets</b>	<ul style="list-style-type: none"><li>• How to identify targets</li><li>• Energy-efficiency and emissions-reducing resources</li></ul>	<ul style="list-style-type: none"><li>• Project prioritization</li><li>• Deep retrofit support for select projects</li></ul>

\*Frontline and BIPOC communities include black people, Indigenous people, sovereign tribal nations, communities of color, immigrants, refugees, youths, elders, houseless people, disabled people, LGBTQ+ people, and people with low and no income.

## About City of Seattle Office of Sustainability and Environment (OSE)

OSE develops policies and programs that reduce climate pollution and works to advance an equitable clean energy transition by prioritizing investments in communities historically most harmed by economic, racial, and environmental injustices.

Through the Accelerator, OSE will:

- Offer no-cost support to meet the State law and reduce emissions that pollute the air and environment.
- Connect participants to incentives and other financial support.
- Gather participant feedback to inform future Seattle Clean Buildings Accelerator program offerings.

## About Stillwater Energy

Stillwater Energy is an energy management consulting firm dedicated to inspiring action and creating a lasting impact by driving meaningful energy savings.

Through the Seattle Clean Buildings Accelerator, Stillwater will:

- Support Seattle building owners and operators in implementing solutions to address Clean Buildings Performance Standard requirements.
- Help organizations produce meaningful energy and carbon reductions that improve the bottom line and align with Seattle requirements.
- Leverage leading knowledge of energy accounting, building operations and energy management strategy.

## Long-Lasting Benefits Beyond Compliance

Participation in the no-cost Seattle Clean Buildings Accelerator will help you not only to meet with the Clean Buildings Performance Standard law, but also to tap into a host of additional benefits, including:

- Saving money and energy right away and for years to come.
- Leveraging incentives and support services.
- Developing success stories for occupants and tenants.
- Establishing persistent energy management practices.
- Implementing scalable solutions for one or more buildings.
