TOPICS COVERED:

- Intro to Seattle’s Building Emissions Performance Standard (BEPS) and WA State Clean Building Performance Standard (CBPS).
- Intro to Seattle Energy Code: Alterations and Equipment Replacement.
- How BEPS and the Seattle Energy Code complement one another, including where requirements overlap, differ, and reinforce long-term building performance and decarbonization goals.
- Which buildings are covered by each policy.
- Understand BEPS compliance timelines, thresholds, alternative compliance paths, and reporting expectations.
- Q & A with Seattle Office of Sustainability and Environment and Smart Buildings Center staff members.
